

England hopes shattered by the news of this “superstar”

By Josh McCartney

With 35 goals this season Harry Kane is becoming one of Europe’s best attackers but, over the last 18 months, he has suffered three severe injuries to his ankle that have put him on the side-lines for many games. Last year he suffered a similar injury which made him be ruled out of the team for ten games. This year he has had the same injury against Bournemouth and will be out till next month.

This year he has 24 league goals but this injury has probably stopped him from been leading goal scorer. After a collision with Asmir Begovic, he was forced to leave the playing field because of his ankle been damaged. With Harry Kane injured, Tottenham have a chance of not achieving their goals of getting a top 4 position. He said in an interview, “I’m disappointed that I’m out till next month but injuries are part of the game.”

With big games coming up, Tottenham have to quickly find ways of winning as their “amazing” attacker is out. Although he is out for Tottenham, he should be fit for the World Cup but if he isn’t, then it will be a massive loss for England. Tottenham manager Mauricio Pochettino said that he is concerned over Harry Kane’s injury.

Harry Kane has proved himself over the years, so many people are upset as Crawshaw Academy staff have told us. However others won’t be bothered as they might support a rival of Tottenham or maybe support a different country to England. England fans on the other hand hope that he is back for the world cup as they want England to do well even though they probably won’t.
