

Geography

has two trial exams:

Exam 1 (2hrs)

This exam will cover all the content since the start of Y10 including urban, living world (deserts & rainforests), coasts and hazards. There will be a mixture of short answer questions e.g. multiple choice, figure response questions and longer prose questions e.g. 5/6 and 9 mark questions.

Exam 2 (1hr)

This exam will focus on Geography skills and fieldwork. The first half the paper will be on Geographical Skills which will require students to look at unseen data to create a range of graphs and then to analyse their findings. The second half will include questions about fieldwork from the York and Hornsea visit. This will include questions on methodology, data presentation methods, data analysis, conclusions and evaluations. Students must remember the titles of their enquiries as they will be asked this.
